Overall Architecture

Bond Event Based Architecture

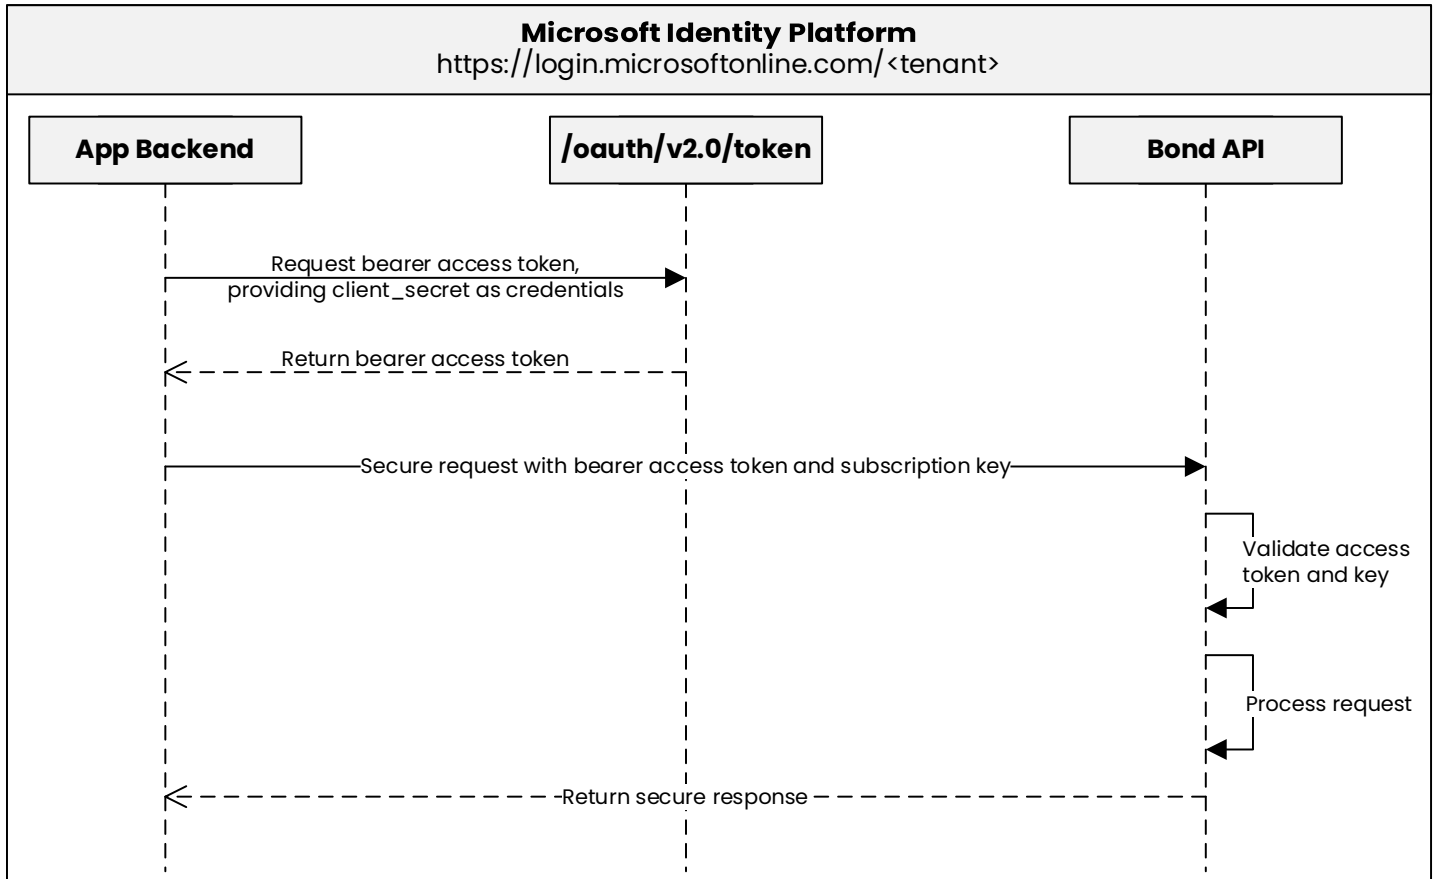

Authentication and authorization.

- JWT Bearer Tokens

Bond uses two levels of authentication: subscription key and JWT bearer token.

Requests with invalid tokens generate **401 Unauthorized** error.

Access token request parameters

Parameter	Required?	Description
tenant	Yes	The directory tenant the application plans to operate against.
client_id	Yes	The client ID assigned to the application.
scope	Yes	The application ID uniform resource identifier (URI) of the requested resource.
client_secret	Yes	The client secret generated for the application. This value must be URL-encoded before being sent in an access token request.
grant_type	Yes	Must be set to client_credentials

API requests must be made over HTTPS TLS v1.2 with the following request headers. Calls made over plain HTTP or without authentication/authorization request headers will fail.

Transaction API.

HTTP Method	Route	Description
POST	/points/transaction	Process point transaction

Process Point Related Transactions.

POST /points/transaction

Request body

Request body:

```
{
  "transactionId": "guid",
  "transactionDate": "datetime_utc",
  "pointDate": "datetime_utc",
  "customerUniqueId": "guid",
  "Partner": {
    "partnerCode": "ENUM",
    "locationCode": "string"
  },
  "items": [
    {
      "Points": "int",
      "PointCategory": "ENUM",
      "PointDescription": "Desc",
      "Offer": {
        "id": "string",
        "name": "string",
        "code": "string"
      }
    }
  ],
  "metadata": "string"
}
```

PartnerCode

```
{
  SCENE = 1,
  BNS,
  RAKUTEN,
  RECIPE,
  CINEPLEX,
  EXPEDIA,
  BAKKT,
```

```
    HRG,  
    BLACKHAWK,  
    BOND,  
    SOBEYS = 19,  
    HOMEHARDWARE = 20,  
    SDR = 21  
}  
  
PointCategory  
{  
    Earn = 1,  
    Adjustment,  
    Transfer,  
    Bonus  
}
```

Response

Sample response body:

```
{  
  "statusCode": 202,  
  "requestMethod": "POST",  
  "requestUri": "/points/transaction",  
  "product": "env-partner",  
  "apiName": "Transaction API (Partner) (ENV)",  
  "responseTimestamp": "8/30/2024 00:00:00 PM +00:00",  
  "acknowledgmentToken": "1724089179-P-190e94eb-6102-4da2-bb2d-e1610bcdcf1f"  
}
```

Offer API.

HTTP Method	Route	Description
POST	/offers	Get Salesforce offers

POST /offers

Request body

Request body:

```
{
  "Filters": {
    "CampaignType": [
      "all"
    ],
    "Partner": [
      "all"
    ],
    "OfferOptIn": [
      "all"
    ],
    "OfferType": [
      "all"
    ],
