

BOND Azure

PROPOSED SOLUTION

Cosmos Streaming
Trigger on changes

sceneplus-prod-cosmoschangefeed-job-p

Eventhub Queue
scene-cosmoschangefeed

sceneplus-prod-eventhubnamespace

Streaming Job
No Change on Doc Schema

CDC Streaming
This will trigger on Any DB changes

sceneplus-prod-datastreaming-job-p

Eventhub Queue
scene-datastreaming

Data Lake

Job Cluster Name:
Read_BNS_Datastream

No Change on Doc Schema

Data Lake: sceneplus-prod-adb

Aggregate the transaction as per
Business Requirements

NEW JOB

Storage (Azure)

This will run Realtime or Batch with
minimal configuration on changes
to core transaction and custom
table changes and store the
Aggregate value one per customer

APIM

REAL-TIME
Existing Endpoint
To Incorporate new Filters

sceneplus-prod-point-http-p

One doc per
Customer
Create/Update/Delete

sceneplus-prod-synapse-cosmosdb-p
NEW CONTAINER

New Endpoint in
sceneplus-prod-internal-http-p

New Queue in
sceneplus-prod-servicebusnamespa
cepremium

WAF & SECURITY LAYER
